INTRODUCTION

This guide is a step by step process to remove the battery of the phone. It is a preliminary step to many installation guides.

TOOLS:

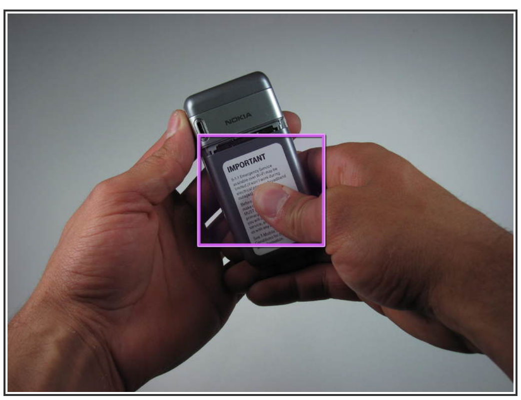

- iFixit Opening Tools (1)

Step 1 — Battery

- Turn off the phone.
- Check if there is a microSD card in the slot behind the door on the side. If so, remove it by first pushing it in, then pulling it out.
- Position the phone so that the back side is in view.

Step 2

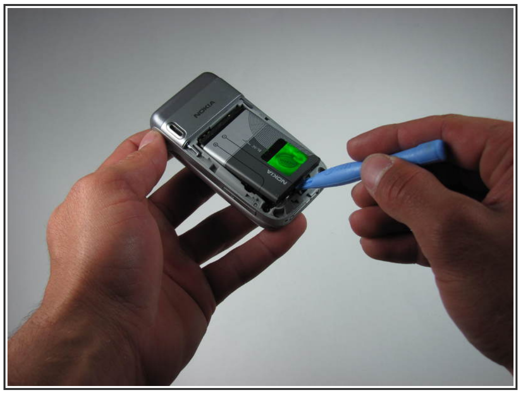

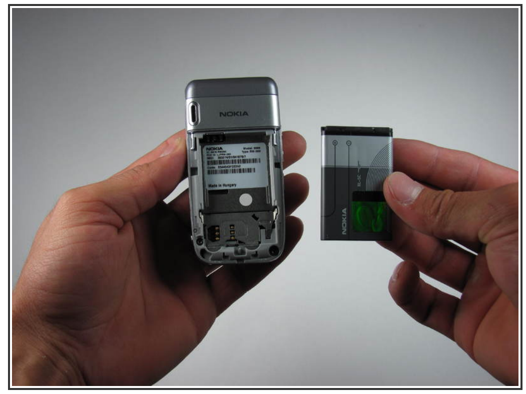

- Remove the back battery cover.
  - Apply pressure on the cover while simultaneously sliding the cover downward.

Step 3

- Insert the iPod opening tool between the base of the phone and the phone battery.
- Position the phone so that the battery won't fall out of the phone.
  - ⓘ The battery lifts out of the phone fast and easily.
- Carefully lift the battery out of the phone.

To reassemble your device, follow these instructions in reverse order.
